Other Note:

Painting For Reservoir - External Wall

A. Surface Preparation:

Freshly plastered should be allowed to dry out completely. Plaster nibs and splashes should be scrapped off. Efflorescence. If present, should be removed and paintwork should only commence when efflorescence has stopped. For previously painted surfaces, care should be taken to ensure clean surface free from dust, dirt, grease and other undersirable. Flaking paint work, if any, should be treated appropriately by either physical removed/ high pressure water jet or stabilizing with pretreatments solution prior to painting.

B. Painting System.

1 CoatWBE Sealer

2 Coats Acrylic # 2000 SBC ( Nippon Weatherbond - White )

A Styrene Acrylic resin based incorporating premium grade weather resisrant ceramic pigments.

Specific gravity, 25 C: Approx 1.2 kgs/Liter

Volume solids : Approx 45%

Typical Dry Film Tickness (WFT) : 67 microns per coat.
